Town Football Team Awarded Bennett Game

A. F. A. Unanimously Rules That Protested Game Goes to Redcliff

This week the secretary of the Town football team received word from the executive of the Alberta Football Association informing him that the Town's appeal against the decision of local football Council, Which ordered a replay of the final game with the Legion in the Bennett Shield competition was unanimously upheld by the executive. This means that the executive has awarded the game to Redcliff. The secretary was also informed that arrangements had also been made for Redcliff to play Lethbridge on Saturday, in the next round of this competition.

This ruling on the part of the provincial executive is only what was expected as it was the the opinion if a large percentage of football players, officials and supporters of all four teams in the league, that the local Council had made agrlaring mistake in going against the ruling of referee in the game concerned, and in ruling as they did.

The outcome of this controversy should have a stimulating effect on this line of sport in the future. It shows that football teams in smaller centres are not entirely at the mercy of local officials when such teams feel they have a real grievance.

The executive of the Town team deserve great credit for the able manner in which they handled this affair. So sure were they that they were in the right that the matter of having topu up $25 to have their appeal heard, did not dampen their ardor.

DRAW MADE FOR THE LENNETT SHIELD GAMES

The draw for the provincial soccer championship district series has been made and is as follows:

August 24th—"A" Kimberley Tunnel vs Hillcrest, at Kimberley. "B" Redcliff vs Lethbridge at Medicine Hat.

August 31st—"C" Winner of game "A" vs winner of game 'B' at point to be announced later.

September 7th—"D" Calgary vs winner of game "C" at Calgary.

Miss Leona Ardinger, of Yakama, Wash., is th guest if Miss Dora Hicks

Three Shows at Cameo Next Week

Adie's Irish Rose Billed For Next Monday and Tuesday

Patrons of the Cameo are to have the opportunity of seeing one of the best pictures on the road, next Monday and Tuesday when "Adie's Irish Rose" will be shown. This is a real homelike picture in which an Irish boy falls in love with a Jewess. Their fathers, who are staunch supporters of their respective faiths, are horrified with the prospects of the match, and the Irish wit and Jewish Shrewdness which run through the picture keep the audience convulsed with laughter one minute and reduced to tears the next. Finally the marriage brings the families together and priest and rabbi join in the celebration. Don't miss seeing it.

Mary Astor has been princess and seamstress separately in past film roles, brt in "Heart to Heart," which comes to the Cameo next Thursday for the first time in her career is both at the same time. She wanted to be just "Ilen" but home town folks wouldn't let her until a he-man over made her a wife.

TEESWATER TEACHER HAS A LONG TEACHING RECORD

Last week Teswater, Ont., held an old boys' and old girls' reunion, and one of the pricipal events of the occasion was a visit to the school where Miss Sharpe, a native of the town, has been teaching for over fifty-five years. Among those who visited her were men and women whim she had taught as children and among them were judges, doctors lawyers, professors, ministers and teachers. She was presented with an address and a purse containing over $700. Miss Sharpe is a niece of Mr. Wm. Henderson of this town. Miss Sharpe must have inherited some of her uncle's good health as Mr. Henderson, although in his 91st year, is still actively engaged in business.

Mrs. Jas. Waters, of Vancouver, is visiting her daughter, Mrs. G Myer

* * *

Walter Bamforth and his bride arrived in town last evening on their honeymoon and will spend a few day here visiting Walter's parents, Mr and Mrs. Geo. Bamforth.

- - - Items of Local Interest - - -

Ronald Rulla of Rockford has been spending his holidays here visiting his mother and brother.

* * *

Leonard Henderson returned last week end from a motor trip through the mountains and down through U. S. border cities.

* * *

Mr. and Mrs. Lloyd Fairbairn who are returning from their honeymoon trip to the coast, are spending this week in town visiting the former's parents, Mr. and Mrs. W.J. Fairbairn

* * *

Keep in mind the big celebration in Redcliff on Labor Day, July 2nd. there will be a good program of horse races and athletic sports for which good prizes will be offered.

* * *

Just prior to her wedding, Miss Bardell was the guest of honor at a shower given by Mrs P.E. Broughton About thirty friends assembled and a pleasant social time was spent during which the bride elect was presented with a number of beautiful and useful presents

* * *

Workmen are now busy renovating the front of the Cameo theatre. The stucco is being removed and replaced with metalic covering. When completed this will greatly improve the appearance and safety of the building. Since taking over the management of this theatre Mr. Sherany has has greatly improved it inside and out.

The K. P. lodge of Medicine Hat has made arrangements with the 166 regimental band of the K. P. Uniform Rank, of Columbus, Ohio, to put on one of their high class entertainments in the arena in the Hat on Sept. 7th. The program will be made up of all kinds of vocal and instrumental music by well trained artists.

Mr. and Mrs. G. Simmons of Ponoka, are visiting Mr. and Mrs. Hitchen

* * *

K. Johnson was visited last Sunday by an old office colleague, Mr. S. P. Hunter, who motored over from Orion with Mrs. Hunter.

* * *

The wedding of Miss Ozemiora May Hicks to Mr. Macdonald Millard is announced to take place in St. Ambrose Church on Wednesday, Aug 28th at 6:30 p. m.

* * *

K. L. Shafford reports receiving a letter by air last week from his daughter in London, Ont. He says the letter bears a stamp showing it left London at 10 o'clock a. m. and arrived in Medicine Hat at 6 p. m. the same day.

* * *

Mr. and Mrs. Fred Jones left last week for Calgary where Mr. Jones has secured a good position. Before leaving Mr. Jones was tendered a farewell evening at the Legion club rooms where he was presented with a gift as a token of remembrance from Redcliff friends. Mr. and Mrs. Jones will be greatly missed here.

* * *

A surprise party was sprung on Mr. and Mrs. W. J. Fairbairn last Monday evening when a number of friends from town and Medicine Hat visited their home to extend a welcome and congratulations to their son and daughter-in-law who are on their way home from their honeymoon. Progressive bridge was played and the prizes were won by Mrs. McGregor and Mr. C. V. Gibson. After cards refreshments were served and a pleasant social time spent.

* * *

Mr. and Mrs. W. E. Moire and daughter, Mary, of Peace River, spent last Friday in town visiting their niece, Mrs. Rpert Cann,

Town vs Callies Called For Darkness

Game Scheduled For Replay Friday Evening of This Week

As the football game last Friday evening between Redcliff Town and the Callies was called on account of darkness, Redcliff last another opportunity to tie with the Legion for first place in the Five Roses Cup series. The game was a nice, clean, snappy one bu neither side was fortunate enough to score before the game was rallied, and lost has to be played over. The replay is scheduled for Lridey evening of this week.

The way these closing games are turning out this season shows that there is no frame up between the teams and that each is playing the game to a finish. It has been a old stunt that when a team has nothing to gain by winning it "throws" the game to the opposing team which is still in the running. That practice spoiled many lines of sport from the spectators' standpoint in the past. In his football league there such games were played this season but in all cses the tail-enders tried as hard to win as they ever did. The result was that these games were among the best of the season and the fans who attended them got the worth of their money. This is a good sign as it shows that all the teams in the league are getting a good show for whatever honors they win.

Mr. A. McCann, provincial engineer, is intown this week making preparations to start a survey of the district to secure an accurate listing of the different altitudes in the vicinity. He will have a gang of men here ready to start the work this week end. It is expected to take about six weeks to complete.

Legion Wins Out in The Five Roses Cup

Defeat The Brick & Coal 1-0 Here Last Tuesday Evening

By winning out from the Brick & Coal here last Tuesday evening, the Legion cinched the Five Roses cup and practically put the finishing touches on the schedule for this season. Although some good ball was played in Tuesday's game is was considerably spoiled by the wind. However it was anybody's game right up to the finish as the Legion won out by only 1 goal to 0. After the Legion scored the B. C. boys worked hard to equalize and on three different occasions it looked as though hey were going to succeed but they failed to make the grade.

This game practically closes the books for the season. The Town team was to have played the Callies on Friday evening of this week but as the Town goes to Lethbridge on Saturday the Friday game has been called off.

The result of the season's play is that the Legion has won the league and the Five Roses up. Redcliff Town has won the McClellan Cup and the district championship for the Bennett Shield trophy. The season has been one of the most successful and interesting for many years.

The juniors are pleased with their ride on Wednesday, the 14th inst. the weather was just the kind that calls for ice cream and more ice cream, and the shade of the trees on the vicarage lawn was pleasant and grateful. Visitors kept dropping in all afternoon and patronizing the little tea tables, the cake stall and the fish pond, and the adult helpers as well as the juniors themselves were kept busy. On the whole the day was thoroughly successful and with a enjoyable for all concerned.

HEAP CASH MAYBE COMING TO RED MAN FOR OIL HOLDINGS

The Stoney Indians on the Morley Reservation along the line of the Canadian Pacific Railway near Calgary are benefiting by the oil developments in Alberta. Every man jack of the 640 members of the tribe, representing 128 families, receives $10 per annum for oil lease rentals on the tribe's land and should oil materialize will receive a 12½ per cent. royalty on all production, a certain amount of which will be set aside for agricultural implements. They gathered in all their Indian bravery of feathers and finely worked shirts, shawls and moccasins on the occasion of the first payment. Pictures show Chiefs Wolf Tooth, Long Buffalo and Black Buffalo saluting the derrick, source of their new wealth. Chief Hector Crawler receiving payment from R. Hinton, Indian Agent at Morley; Indian with pipe in mouth is "Wild Man," son of "Wild Woman." Chief Wolf Tooth inside derrick with driller. Squaw Becky Beaver and papoose counting her money. She looks heap happy.

"In Selling Position"

Alberta Wheat Pool members should appreciate what it means to the Central Selling Agency to have Pool wheat in "a selling position."

To make the best sales, Pool wheat should be in a position where it is instantly available, and where long and troublesome delays are not incurred.

When Pool wheat is in Pool elevators the Selling Agency can depend on it being directed whe ever it is wanted. For that reason, if for no other, Pool wheat should be delivered to Pool elevators.

Besides this, Pool elevators give Pool members an assurance of fair treatment to an extent never known in the days when there was no Wheat Pool.

YOU CAN BEST AID YOUR SELLING AGENCY AND YOUR OWN ELEVATOR SYSTEM BY DELIVERING YOUR WHEAT TO POOL ELEVATORS.

What Is a Good Government?

Hon. R. B. Bennett, in addressing a meeting at Stratford, Ontario, recently asked a question, and in answering it, gave a definition of a good government. He said:

"Is it not time that we had a government that would look after the interests of Canadians and Canadians only? You say that is a selfish policy. Mr. my friends, all good governments are selfish and the measure of the goodness of a government is the measure of its selfishness."

Mr. Bennett was, of course, discussing the relative merits of the tariff policies of the Liberal and Conservative parties, and especially so in the light of the impending tariff changes at Washington. These being issues of a partizan character it is not our intention to discuss them, or express any opinion in regard to them. But it is quite in order to analyse and discuss Mr. Bennett's dictum that "all good governments are selfish," and that the measure of the goodness of a government is the measure of its selfishness.

Governments under our democratic system of responsible government are, or should be, but a reflection of the people themselves. They are brought into being by the expressed will of the people and are supposed to give expression in legislation and administration to the wishes of the people. Therefore, if a good government is a selfish government, it follows that selfishness is the sign manual of a good people, and that the selfishness of any people is the measure of their goodness. Do the Canadian people believe this? Are they prepared to accept it as true?

Acceptance of this doctrine would be to deny all the teachings of Christianity. It would be to nullify and reject the Golden Rule. It would set up a standard of conduct for nations and peoples that could have but one result,—continual warfare.

If the measure of the goodness of a government is the measure of its selfishness, then a "good" government in Manitoba, Saskatchewan, Alberta, or any of the other Provinces, would be one which pursued a policy designed to advance its own interests regardless of the interests and welfare of any other Province, or of the Dominion, or the Empire as a whole. Such a policy would mean endless friction, constant turmoil, the ultimate smash-up of Confederation.

Suppose, for example, that rightly, or wrongly, the Western Provinces of Canada insisted that their particular interests demanded the complete removal of all customs tariffs, and they refused absolutely to give any consideration to the views, the interests, the welfare of the Eastern Provinces which believe in customs tariffs. What would be the result?

All government is a matter of compromise. No one group of people, no one community, no one province, can selfishly insist upon acceptance of its views and its policies to the detriment of all other groups, communities and provinces. But if selfishness is to be the measure of a good government, then insistence by each group, or community, or province, upon its own views and policies means that any and all compromise will be impossible, and government itself must fail.

Acceptance of Mr. Bennett's doctrine would condemn the governments of Great Britain for many decades past as the worst governments in the world, because it has been the policy of British Governments to adopt policies of unselfishness, to assume heavy burdens and accept great responsibilities in behalf of backward peoples and smaller and weaker nations. Great Britain unselfishly entered the war against Germany in defence of the rights and integrity of Belgium. Following the war Britain waived all debts owing to her by other allied countries,—save, and except an amount sufficient to cover her own indebtedness to the United States. These are but two comparatively recent examples of British policy, but it is being exemplified at almost every meeting of the League of Nations. That League, for example, could not exist five minutes if the nations of the world were animated by, and acted upon Mr. Bennett's definition of what constitutes a good government.

The most selfish form of government is an absolute autocracy. How would Mr. Bennett like Premier Mackenzie King to adopt the selfish attitude of Mussolini in Italy, take all powers of government into his own hands, and prohibit any opposition parties from functioning? That's selfishness in government. Is it good? Whatever Mr. Bennett may think, the people of Canada want none of it.

Suggests Powerful Signals For Vessels

Sea Should Be Better Illuminated Says French Writer

A well-known French writer has pointed out that ships have been backward in making use of the great improvements made in modern electric lighting. He states that in this modern age of illumination the sea is the only part of the globe which is plunged into obscurity at nightfall, and recommends that ships should employ powerful signals like the headlights of motor cars. Undoubtedly the weakness of ships' lighting is a contributory cause to many collisions that occur at night, and the fuller study of the possibilities of more powerful electric lighting is worthy of the labors of the Conference (the International Conference for the Safety of Life at Sea.)

Holstein Bull Goes East

Prize Winner From Strathmore Purchased By Quebec Interests

The Raymondale Farm, at Vaudreuil, Quebec, recently purchased a Holstein bull from the Canadian Pacific supply farm in Strathmore. This bull, Strathmore de Winton Matchless, was junior champion last year at Calgary, Edmonton and Saskatoon, although defeated at other shows by his herd mate Strathmore McKinley Fairchild Wayne.

Sour Stomach

Just a tasteless dose of Phillips' Milk of Magnesia in water. That is an ideal, effective, yet harmless. It has been the standard antacid for 50 years among physicians everywhere. One spoonful will neutralize at once many times its volume in acid. It is the right way, the quick, pleasant and efficient way to kill the excess acid. The stomach becomes sweet, the pain departs. You are happy again in five minutes.

Don't depend on crude methods. Employ the best way yet evolved in all the years of searching. That is Phillips' Milk of Magnesia.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

New Plane Is Climber

British Machine Reaches Four Mile Height In Fourteen Minutes

An all-steel airplane that can climb to a height of four miles in less than 14 minutes is the latest addition to Britain's air fleet.

The plane is a single-seater equipped with a super-charger and specially-geared Jaguar motor developing 400 horse power. With a full load of machine guns and ammunition in addition to electrically heated clothing and oxygen breathing apparatus, it can climb to a height of six miles. Its top speed is 188 miles an hour.

The plane is intended to take off from a home defense aerodrome and to climb rapidly to get above enemy raiding machines as soon as information is received that they have crossed the coast.

LIFE WAS A BURDEN

Health Restored Through the Use Of Dr. Williams' Pink Pills

"I am writing to express my gratitude for what Dr. Williams' Pink Pills have done for me," says Mrs. W. J. Dowling, Tottenham, Ont., and further says: "I was so badly run down that I felt that life was a burden. The doctor said my trouble was due to poor blood, but his medicine did not help me. My face was sallow, my lips bloodless and at the least exertion my heart would palpitate so violently that I would have to lie down. My feet and legs would swell and cramp, and all my friends thought I was in a decline. In this condition I was urged by a friend to try Dr. Williams' Pink Pills. I got three boxes, and to my delight, by the time I had used them I began to feel better. I got a further supply and kept on taking them. Daily I felt myself growing stronger. The color returned to my cheeks and lips and I felt a new interest in life. To sum up I can now say that I am feeling fine, for which I give the credit to Dr. Williams' Pink Pills, which I strongly recommend to all weak girls and women."

A useful book, "Building Up the Blood," will be sent free on request by the Dr. Williams' Medicine Co., Brockville, Ont.

Dr. Williams' Pink Pills are sold by all druggests or will be sent by mail post paid, on receipt of price, 50c. Try them today.

Developing Trade

Increased Travel To the West Indies Follows Inception Of New Service

Since the inception of the new service between Canada and the British West Indies, by the R.M.S. Lady Nelson, in December last, the Canadian National steamships' boats have been practically booked to capacity on every sailing. Traffic between Canada to the West Indies has developed tremendously since the inception of the new Canadian National liners, and there has also been an increase of travel from the West Indies to Canada particularly in the summer time when attractive rates give the West Indies business man an opportunity of going to Canada to study the markets there.

Miller's Worm Powders seldom fail. They immediately attack the worms and expel them from the system. They are complete in themselves, not only as a worm destroyer, but as a highly beneficial medicine for children, correcting weak digestion and restoring the debilitated system to healthfulness, without which the growth of the child will be retarded and its constitution weakened.

Horses Live In Zoo

The stable of a London horsekeeper is a zoo, the animals sharing the house with the horses. There are 100 horses in the stable and with them, living contenedly, are two Indian monkeys, a wild hare, a vixen, pigeons, rabbits, canaries and foreign birds.

A pleasant medicine for children is Mother Graves' Worm Exterminator, and it is excellent for driving worms from the system.

Sunspots and Birds

A record kept at Montdidier, France, 1784-1869, of dates of arrival of birds and rainfall reveals a marked relationship to sunspot variation, according to investigations made at the Dominion Observatory, Ottawa. For instance, the cuckoo on the average arrived two weeks later at sunspot maximum than at minimum.

Corns cause much suffering, but Holloway's Corn Remover offers a speedy, sure, and satisfactory relief.

Very Considerate

"I just had a 'phone call from Skippy. He's the most considerate boy I ever knew."

"What did he have to say?"

"He wanted to know if I got home all right from the dance he took me to last night."

Keep Minard's Liniment in the Medicine Chest.

No Unemployment Problem In Iceland

Country Offers Great Opportunities Through Undeveloped Land

Iceland has no unemployment problem, not because folks have to work to keep warm up there, but because Iceland is an undeveloped land of great opportunities.

The unemployed of Reykjavik totalled eight men on May 1. Six of them were more than 60 years old and in ill health. The other two said they had just left their jobs, and could get better ones.

Iceland, peopled with only 100,000 inhabitants, could comfortably find accommodation and employment for 900,000.

Iceland wants dirt farmers, not men to keep the bright lights of Reykjavik burning. The native Icelanders are good farmers, but not scientific agriculturists.

Government authorities maintain that Iceland could produce far greater quantities of agricultural products than at present, as the soil and climate are excellent for many crops.

An Important Industry

General Public Does Not Realize Value Of Canadian Fish

The fishing industry is one that rarely receives much attention from the general public, but it is an important and growing industry in this country, as one realizes in scanning the concise items sent out from time to time by the fisheries branch at Ottawa. We catch them all the way from sardines to whales. For example, we sold $2,071,000 worth of fish, nearly all tinned, to Australia in that country's fiscal year, 1927-28. In the first two weeks of May, this year, 20 whales were taken by a company operating from Rose Harbor, B.C. The whales taken off British Columbia are used in production of oil, meal, fertilizer, and are valuable, too, for their whalebone.

Maintains Its Popularity

Canadian Salmon Still Holds First Place As To Money Value

Canadian fish have won a great reputation abroad, a reputation that shows in accumulating orders on an expanding scale. This country's salmon—for years the most valuable monetary item in the catch—still maintains its popularity.

Cod, which appears to have been the first lure for the hardy European fishermen of the long ago, comes next and the succulent lobster has third place. Sardines are in the swim too: there have been fine orders from Nova Scotia and Australia of late years for these tasty fish and the trade in them grows.

The Friend Of All Sufferers... Dr. Thomas' Eclectric Oil is a valuable remedy to all those who suffer pain. It holds out hope to everyone and realizes it by stilling suffering everywhere. It is a liniment that has the blessing of half a continent. It is on sale everywhere and can be found wherever enquired for.

Valley Of a Thousand Falls

The name Valley of a Thousand Falls, in the Mount Robson District, British Columbiba, was bestowed by the Rev. G. B. Kinney, who first visited the region with Dr. A. P. Coleman, and participated in his attempt to climb Mount Robson.

Relieves Asthma At Once. If you could read the thousands of unsolicited letters received by the makers from grateful users you, too, would realize the remarkable powers of Dr. J. D. Kellogg's Asthma Remedy. All cases, incipient and chronic, are benefited by this great family remedy. Why suffer or experiment with worthless preparations when the genuine Kellogg's can be purchased everywhere.

Moose Jaw Tourist Camp

Additional facilities are being provided at Moose Jaw Auto Tourist Camp. Last year about 7,000 people used the camp and the present season is expected to witness a considerably increased attendance.

Minard's Liniment for Rheumatism.

Farm Planning

Town planning in Alberta is now being extended to include farm planning. The farmer may secure expert advice concerning the plans for his house and barns, and the lay-out of his farm.

Eliminating Level Crossings

Will Take Time But Fund For This Purpose Is Available

It is to be recognized that $200,000 a year will not make for very rapid progress in eliminating the many hundreds of level crossings in Canada, but this fund, known as the railway crossing fund, at least offers opportunity for gradually getting rid of some of the worst of these deathtraps. Dr. S. J. MacLean, assistant chief commissioner of the Dominion Board of Railway Commissioners, has drawn attention to the existence of this fund and suggests that it be availed of in Saskatchewan.

Dr. McLean has pointed out that the sum of $200,000 is voted annually by Parliament for the elimination or improvement of railway crossings, and this sum is at the disposal of the Railway Board to distribute as it sees fit. Alberta has recently been granted a considerable amount, and Manitoba has also taken advantage of the fund. Manitoba, in fact, in co-operation with the Railway Board, has done good work in getting rid of some dangerous railway crossings. This has been done by some minor changes in roads and highways, making it unnecessary to cross railway tracks.

Some day the authorities may undertake to eliminate every level crossing in Canada, but, on account of the huge expense that would involve, the time appears a long way off. Meanwhile a good deal can be accomplished by the means outlined, and Dr. MacLean's suggestion ought to be widely considered.—Regina Daily Post.

Canadian Teachers' Federation

1930 Convention Will Be Held At Edmonton

The selection of the venue for the 1930 convention of the organization, the election of the executive committee and the adoption of a number of resolutions comprised the final business transacted at the closing session of the tenth annual conference of the Canadian Teachers' Federation at Quebec.

Edmonton, Alberta, was chosen for next year's conference at a date to be decided later by the executive committee.

The following members were elected to the executive committee of the federation: G. H. Ford, New Westminster, B.C.; A. J. Powell, Ford, Sask.; J. R. Mackay, Saskatoon, Sask.; A. E. Heard, Winnipeg, Man.; J. E. Robertson, Toronto, Ont.; Miss L. E. Brittaur, Montreal, Que.; H. C. Ricker, West St. John, N.B.; J. A. D. Good, Truro, N.S.; and C. B. Jelly, Summerside, P.E.I.

Caution Is Necessary

Motor Drivers Should Use Heads As Well As Horns

"Use your horn! that's what it's there for," is the sound advice of a traffic authority to motorists. He urges them not to steal up behind the unsuspecting pedestrian or pass another vehicle from the rear without giving some signal. "Get the horn-blowing habit," is his injunction. But drivers should also be urged to use their heads, or what are supposed to be heads. Horn-tooting should not take the place of caution. A blast of the horn neither entitles the blaster to the right-of-way nor guarantees him a clear path.

Waiter: What's de matter with dat egg, boss?

Diner: It was served too late to be good egg and too soon to be good chicken.

Minard's Liniment for Earache.

Denied Entrance To States

Young Toronto Inventor Claims He Has More Powerful Substitute For Gasoline

Denied entrance into the United States even for an hour, during which time he had expected to lay his invention before officials of the General Motors Corp., Jack Star, 197 Grace Street, Toronto, claims that he has a lighter and more powerful substitute for gasoline.

Mr. Star is a comparatively recent arrival in Canada, his name in Europe being Jacob Starselski. He is a former racing motorcyclist, and said he had been working on his formula for nine years and had visited Europe, Asia and the continent in search of sources of supply. He carries credentials from Sir Herbert Samuel, British commissioner for Palestine, Mustapha Kemal Pasha and other notables. His researches have involved great expense and long study, he says, and he is working now to obtain world patents on his discovery. He declares he had made arrangements with Frank J. Kinzinger, attorney, of Detroit, to assist him. He was denied entry to Detroit, however, for an hour, although he had offered to leave his car with the authorities at the ferry dock.

New Kind Of Festival

Distribution of 100,000 toothbrushes to children in the primary public schools of Chile will be a feature of the "toothbrush festival" to be held throughout the Republic next fall under the auspices of the Chilean Ministry of Education.

The blood absorbs about two pounds of oxygen daily.

It isn't the girl who fires up quickly that makes the best match.

Are You Ready

When your Children Cry for It

Baby has little upsets at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—what most physicians would tell you to do—give a few drops of plain Castoria. No sooner done than Baby is soothed; relief is just a matter of moments. Yet you have eased your child without use of a single doubtful drug: Castoria is vegetable. So it's safe to use as often as an infant has any little pain you cannot pat away. And it's always ready for the crueler pangs of colic, or constipation, or diarrhea: effective, too, for older children. Twenty-five million bottles were bought last year.

Fletcher's CASTORIA

New Departure In Finance

Large New York Bank Saves Small Borrowers From Loan Sharks

When a bank finances a corporation with millions of dollars, that is not news. But when the same bank throws its resources behind John Smith's unpaid doctor bill, that is a new departure in finance. The National City Bank is doing just that, taking care of such bills for worried people who are not even depositors, shouldering their financial burdens in a way that is saving thousands from the loan sharks.

In a year, 50,000 persons have received loans from the bank, and 97 per cent. of them have made good on their payments. The loans averaged only $320 each and were nearly all made to small wage-earners.

Sta'istics compiled from the first year's experience indicate that the average borrower is thirty-four years of age, has been in the same position steadily for more than five years, earns $2,756 a year, is married and has one child. He has got behind on his rent, his insurance, his doctor bill, payments or improvements on his house, or some such personal emergency. He needs a little money badly for a short time, and is glad of a chance to borrow at 6 per cent. from a bank, rather than from friends and relatives, and to pay it back by small weekly or monthly payments extended over a year.

One of the first applicants for a loan was a man who had, a year before, been compelled to borrow $1,000 to meet expenses in connection with the long illness and death of a daughter. He secured this loan from a small loan association of business associates at a prohibitive rate of interest—100 per cent. Able to pay only $20 a week, at the end of a year he had paid a full $1,000 but still owed the principal, and was in despair. Borrowing $1,000 from the bank, he was able in 1928 to get free from this debt.

Loans are not made for luxuries. Thirty per cent. of the loans made to date have been for medical, dental and hospital service, 15 per cent. to pay debts, and 11 per cent. to meet payments on homes.

One feature of this loan service that is comforting is that each borrower is insured, without cost to himself, for the full amount of the loan, so that in case of his death neither the co-makers of his note nor his family has to finish the payments due.

Had Curious Experience

English Motorists Recently Saw Strange Mirage On London-Southampton Road

One of the strangest phenomena ever seen on English roads was witnessed by thousands of motorists. For mile after mile extraordinary mirages danced before the eyes of drivers. "Have you seen the mirage?" was the question wherever motorists met. Driving along the main road from Southampton to London between noon and 1 p.m. writes a correspondent, was a curious experience. In the hot sunshine what appeared to be lakes of water lay every few hundred yards, only to fade away as the car approached. Traffic took all sorts of fantastic shapes. Some cars looked as though they were travelling in the air.

"Three months ago I caught a fish that weighed 40 pounds. I don't remember just when it was exactly now."

"July."

"No, sir. I was telling the exact truth."

"Men who travel a great deal seldom marry" says an explorer. In other words a rolling stone gathers no boss.

Thirty-seven miles of carpet were laid on the floors of a modern hotel recently erected.

"You are quite drunk."

"I know I am, but it will soon pass off. But you are a fool, and that will not pass off."—Hummel, Hamburg.

Rural Nursing

Need For More Hospital Beds, Doctors and Nurses In Isolated Areas

No one orthodox plan of rural health nursing can be laid down and universally accepted as the ideal type of health organizations for all non-urban Canada because of the wide difference in conditions found in so vast a land, Miss Elizabeth Smellie, chief superintendent, Victorian Order of Nurses for Canada, stated in an address on rural nursing from the viewpoint of the public health nurse, at the International Nurses' Congress in Montreal. The full co-operation and combined wisdom of provincial governments, directors of training schools for nurses and the leaders in public life were needed to secure the best distribution of available physicians and nurses, she stated.

Miss Smellie's paper on rural nursing in Canada brought out the need for more hospital beds and more doctors and nurses for isolated areas. "This means larger government appropriations for health purposes to pay adequate salaries," she said, "to ensure professional attention for people requiring it but possibly unable to pay for it, or beyond the reach of it."

Other suggestions for the improvement of conditions in rural communities put forward by the speaker were representations by a public health nursing group on the Dominoin Council of Health, the continued use of the health unit plan, more full-time officers of health, and better living arrangements for rural nurses.

Leaves Son One Dollar

Chinese Father Resented Neglect During His Old Age

Chinese ethics on filial obligations —the duty of a son to his father, according to Oriental ideas—were cited by Chin Man Duck, formerly of No. 9 Pell Street, New York, when his will was filed for probate in Surrogate's Court. Chin died Jan. 9, 1929, in a New York hospital.

"I leave my honored son, Chin Ring," said the document, "only the small and insignificant sum of $1 American, because he was undutiful to me as a son, and neglectful of me during my old age."

Referring to his other son, Chin Jung Dot, of No. 9 Pell Street, in glowing terms the father makes him a bequest of $1,900, which is the residue of the estate, intrusting to his care his wife, Ng Shee, and three other sons, Chin Jung Gu, Chin Jung Ming, and Chin Jung Gwak, all of Lin Far Oon, Kwangtung Province, China.

"I know," says the decedent, "that Chin Jung Dot will provide for them faithfully as he has all the pride of his honorable ancestors."

Totem Pole For Rideau Hall

Presented To Lord Willingdon By Indians At Friendly Cove

Before proceeding to Friendly Cove, Nootka, to remove the totem pole which the Nootka Indians presented last year to the Governor, the Governor-General, T. B. Campbell, Canadian National Railways engineer, known throughout Western Canada, as "Totem Pole" Campbell, because of his work of restoring totem poles for future generations of Canadians and visitors to Canada, spent a week-end at Jasper Park Lodge. The Indians at Friendly Cove, he stated in an interview, through their chief, Captain Jack, had presented Lord Willingdon with a magnificent totem for Rideau Hall, and it was now the engineer's task to uproot it and dress it carefully for its long trip across the Dominion. Friendly Cove was where the famous Captain Cook landed during his voyage along the Pacific Coast.

Canadian Police Forces

The police forces in Canadian cities are of high calibre. There have been comparatively few cases of unfaithfulness to trust recorded in their annals. They are men of integrity. They bring to their duties a high sense of responsibility to the public they serve and protect, and it may be added, the character and achievements of any force depend largely on the chief constable.—Calgary Daily Herald.

Aerial Photography In 1928

During the 1928 season, 88,000 aerial photographs of areas in different parts of Canada were taken by the Royal Canadian Air Force for the Topographical Survey, Department of the Interior. Of these, 17,500 were oblique views and the remainder vertical views.

"This is a heck of a drug-store," we heard a man remark, when told by an obliging clerk that they didn't stock lawn-mowers.

New Director

W. J. Blake Wilson, of Vancouver, Vice-President and Director P. Burns & Co., Ltd., Calgary, who has been appointed a director of the Canada Colonization Association, subsidiary of the Department of Colonization and Development, Canadian Pacific Railway. Mr. Wilson is also a director of the Canadan Pacific and over a dozen other outstanding progressive Canadian organizations.

Dr. Mayo Praises Canadian Brains

Pays Tribute To High Mentality Found In Dominion

Canadian affairs may feel the influence of a billion dollars of American capital, but American affairs feel the influence of $10,000,000,000 worth of Canadian brains, Dr. William Mayo, of the Mayo clinic in Rochester, Minn., said in an interview at Montreal.

The doctor, accompanied by Mrs. Mayo, sailed aboard the "Duchess of Atholl," for Manchester, England, to attend a convention of the British Medical Society.

"I can speak for the place Canadians have in the American medical profession," the doctor continued. "At Rochester 10 per cent. of the American Surgeons Association is Canadian. In all matters except politics, and particularly in science, the two countries are one.

"The boundary line is real as a political demarcation, and this is as it should be."

Law and Order In N.W.T.

The maintenance of law and order in the vast regions known as the Northwest Territories of Canada is one of the important branches of the work of the Royal Canadian Mounted Police. The administration of this great area is carried on by the Northwest Territories and Yukon Branch of the Department of the Interior.

Building Active At Calgary

With land sales to the middle of June valued at $475,000, and with the value of building permits for the same period equal to $4,426,007, officials were convinced that at the end of the half year period Calgary will have passed the most successful half year, as regards real estate, in its history.

A Neglected Duty

People Should See That Horses Receive Plenty Of Water

The horse is largely being superseded in the streets by the motor wagon and the car, but he still gives service to mankind in large numbers, especially in the smaller cities and towns. But there is one duty to him which is badly neglected and which should be attended to wherever practicable.

That is the provision of drinking accommodation in hot weather.

There is a general and deplorable lack of drinking facilities for horses in almost every small city, and this humane provision should be seen to.

Humane societies have many calls on their funds in the direction of prevention of cruelty work. A body of public-spirited citizens ought to be found in every community prepared to act if the local authority does not accept drinking fountains for horses as one of its civic obligations.

Failing that, drivers should occasionally get a pail of water when they stop for deliveries and offer the horse a drink.

That is one of the least, but one of the most necessary, services that man can do for a four-footed servant.

Occupation That Is Dangerous

Sailors On Great Lakes Frequently Battle Heavy Storms

Sitting by the river and lazily watching the Great Lakes freighters sailing placidly by, the average person does not always think of the hardiness and bravery of the men who man the ships. It seems an attractive life to the one who is not a sailor.

But life is not altogether sweet for the sailors of these lakers. Theirs is an existence of danger and trial. Storms at sea are usually associated with ocean liners. Yet tempests bringing grave danger in their wake frequently whip the waters of the Great Lakes into seething cauldrons. When that happens, the crews of the giant freighters have their work cut out for them. Their life instantly becomes a battle for very existence —existence, not only for themselves but for all their comrades on their own ship, and often for those on other craft, who have been endangered by damage to their boat.

Invents Egg Saw

Burned fingers and stained clothing will be a thing of the past when every breakfast table is equipped with the saw for boiled eggs recently invented by a chef of Paris. So believes the inventor. The device is round. Just fit it over the dome of the hen fruit, squeeze the levers, and the circular saw snips off the dome neatly and quickly.

Banff's Famous Springs

The waters of the Sulphur Hot Springs at Banff, in Banff National Park, Alberta, are of great medicinal value and are very similar in composition to the waters at Bath, England.

IT'S FULL OF MENACE

No. 12, Tete Jaune—165 yards, Par 3.

Many an otherwise fine score has been wrecked by this hole on the Jasper Park Lodge Golf Course, Jasper National Park, Alberta, over which the Canadian and Western Canada Amateur Championships will be played, August 19-24, this summer. The reason is obvious by a study of the green in the upper photo and of the lay-out as shown in detail by the lower panel.

Fine fields of golfers are assured for the two big events over this fine course this summer, and the dove-tailing of the Western Canada Championship with the Dominion title event, insures plenty of competitive golf for experts and duds alike.

Two Principal Methods Of Canning

One-Period Cold Pack and the Fractional Or Intermittent Method

The one-period cold-pack method is so called because the uncooked or partly cooked food is packed into a jar and covered with some liquid, such as syrup or water, and both the jar and its contents are heated simultaneously by boiling water or steam. This method may be used for all fruits and vegetables and is recommended for home use. It is a very simple process and completely sterilizes inasmuch as the product is placed in the sterilized jars which are closed during the cooking process so that the organisms are killed and access by any bacteria from the air and other outside sources is rendered impossible. The appearance of the finished product is superior as each berry or slice remains intact. There is no crushing. The flavor, colour and texture are more natural.

Another method, described in Bulletin No. 77 "Preserving Fruits and Vegetables in the Home," obtainable from the Publications Branch of the Department of Agriculture, at Ottawa, is the fractional or intermittent method, which involves the carrying on of the sterilization period for three successive days. This is used in the case of vegetables which are not strictly fresh, and is especially applicable and desirable for those vegetables lacking acid, such as peas, corn and beans. It is more thorough as regards sterilization than the one-day process owing to the fact that spores, which may develop after the earlier sterilization, are bound to succumb during the successive periods of sterilization, but the intermittent sterilization involves considerably more handling than is necessary in the one-day method; also more fuel is consumed.

The Chinchilla Rabbit

Standard Of Registration Is Set By Canadian Small Breeds Association

Of the many breeds of rabbits that are bred for their fur, the chinchilla is perhaps the most valuable. According to Bulletin No. 28, of the Department of Agriculture, at Ottawa, on "Rabbits," the chinchilla originated in France about fifteen years ago. Since then it has spread to Great Britain, the United States, Canada, and many other countries. A standard of registration set up for the fancy chinchilla by the Canadian Small Breeds Association, gives the colour as resembling the wild chinchilla, with an under-colour of slate blue at the base, intermediate portion pearl-grey, merging into dark grey and black, then white, and finally tipped with black. The weight is 6 to 7 pounds for does and 5½ to 6½ for bucks. Other qualifications are described in the pamphlet, which treats of housing, feeding, breeding, and marketing the carcasses and skins.

Serves No Good Purpose

Nothing In Particular To Be Gained By Trans-Atlantic Flight

No one has yet been able to explain what purpose these trans-Atlantic flights serve. There is nothing new in the idea. The trip has been made by a number of planes and lighter-than-air machines. Every successful pilot reports a gruelling experience with the chances all against success, all the way. No government regulation, of course, can stop such flights. If aviators and would-be aviators want to keep on taking chances, there is probably nothing that officialdom can do about it.—Border City Star.

No Argument

The Labor heckler at a Festiging Liberal meeting was very persistent.

"You say you are a Liberal because your great-grandfather, grandfather and father were Liberals?" he asked the candidate. "Then, if your great-grandfather, your grandfather and your father were fools, what would you be?"

"Labor!" murmured the candidate sweetly.

And silence reigned.

Japan's Big Problem

Japan, with a larger population than the British Isles, has a much smaller area of land which can be cultivated. Consequently, she is having difficulty in feeding her people. She imports ten to twenty million bushels of rice yearly.

Mrs. MacTavish: Sandy, there's company at the door!

Mr. MacTavish: Quick! Grab a toothpick!

The name Dixie is derived from the Mason and Dixon line.

Huge Seaplane Is a Marvel

German Company Has Kept Construction a Close Secret

The largest heavier-than-air machine ever built—a mighty 12 motored seaplane—was put on exhibition at Friedrichshafen, preparatory to test flights which may herald an amazing new step in the progress of aviation. It is built to carry 112 persons.

The seaplane was built secretly at the Dornier works on the shores of Lake Constance, and rumors of the great size and power only recently reached the public.

The craft has three decks and 12 motors. Each engine is capable of 500 horsepower.

The plane itself is approximately 150 feet long with a wing span still greater—about 160 feet.

The builder of the craft claims it will develop a maximum speed of about 155 miles per hour and a normal cruising speed of 118 miles per hour.

The plane has quarters for 100 passengers and a crew of 12 men. In addition there is fuel capacity for a flight of about 625 miles with a 50 per cent. reserve fuel load, making the maximum cruising range almost 1,000 miles.

The lower deck of the big plane has space for fuel, baggage and sleeping quarters for the crew. The middle deck is for the well-fitted passenger cabins and a luxurious dining room.

The engine and radio rooms and the pilot's quarters are on the upper or third deck of the seaplane. The motors of the plane will be controlled indirectly from the pilot's room.

The plane has been under construction for many months, the Dornier Company having kept its work secret in order to make the craft as nearly perfect as possible.

Plea For Trees

Value Of Trees Cannot Be Reckoned In Dollars and Cents

The value of a tree was recently made known by an eminent entomologist, who reports that 50 fair-sized elms were recently sold at $5,000 apiece and that many are worth $10,000 each. A tree not only has a cash value, but it also possesses a worth that cannot be reckoned in dollars and cents. It is a very simple matter to plant a tree and it is equally simple to foster its growth. If every properly owner made it a point to plant a tree on available space and refrained from the ruthless destruction of those already well grown, much would be done towards eliminating the follies of promiscuous and thoughtless destruction.—Kitchener Daily Record.

Indians Are Exempt From Motor Laws

Vancouver Island Boards Of Trade Discover Unusual Situation

There are no responsibilities to cramp the style of the carefree native Indian when he is driving an automobile, it was learned through a resolution down for discussion on the agenda of the Associated Boards of Trade of Vancouver Island, in convention there.

The Indian is not legally responsible for any danger he might do while driving, so the Malahat Board of Trade suggests the attorney-general be asked to introduce legislation making it compulsory for Indians to take out third-party insurance policies.

Just Another Cat

She was taking her terrier for a run in the park and met her dearest enemy, who was wearing a wonderful new fur coat.

The little dog jumped up to greet the wearer, who cried, "Down! Down!" in an angry voice.

"Forgive my pet, darling," said his owner. "I can't teach him not to chase cats."

Guest (to waiter)—I've lost a half dollar somewhere on the floor. If you find it you may give it to me, otherwise you may keep it yourself.

"What are you doing here?"

"Is there any harm in my waiting for my 'bus?"—Hummel, Hamburg.

WORLD HAPPENINGS BRIEFLY TOLD

Negotiations between representatives of the German and Belgian governments for settlement of the long-pending marks questions have been concluded and an agreement has been signed.

The first loans issued in British Columbia under the Canadian farm loan scheme, and it is believed the first issued in Canada, have been made through the provincial loan board.

Feping's "hello boys" went on strike because their wages were not paid on time. They did not stop work, but staged a "go slow" strike, carrying on their duties in leisurely fashion, and inconveniencing patrons.

Two United States fishing vessels seized by the Canadian Government Fisheries Protection steamer "Malaspina," at Goose Harbor, 100 miles south of Prince Rupert, recently, were released by Mr. Justice Martin in the Admiralty Division Court.

The much debated revised prayer book of the Church of England will likely be discussed in the British House of Commons again following its endorsation by the bishops assembled in the convocations of Canterbury and York recently.

Dr. Frank L. McKinnon, well known in the medical profession, died at Winnipeg recently after a brief illness. During the war he served for four years in Mesopotamia and was decorated with the Military Cross.

World automobile production increased by more than 1,000,000 vehicles in 1928, as compared with 1927, and set a new record total output for the industry, according to a report of the U.S. Department of Commerce. In 1928, Canada produced 242,382 cars, as compared with 179,054 in 1927.

Aaron Sapiro, famous co-operative marketing expert from the United States, will again tour Saskatchewan this summer in the interest of a 100 per cent. membership for the Wheat Pool. The tour will start the latter part of August, according to a brief telegraphic despatch recently. Mr. Sapiro's voice broke down during a recent tour of the West.

Growth Of Co-Operation

Catching The Vision Of Things That Might and Can Be Done

"Co-operation is a growth and a way of living. Each day a larger and larger number of men and women awaken to the full significance of the truth that no man can live unto himself. There are still those, even in this young country, where progress is second nature, who have not been awakened. They have not yet caught the vision of things as they might and can be. They simply do not understand, and we must not become impatient even with these backward members of society."—A. J. McPhail, President of Saskatchewan Wheat Pool.

The minimum resistance to the forward motion of the wings of an airplane is obtained with a thin wing which has a low lifting capacity.

A Severe Attack of Dysentery Checked by 4 Doses

Mr. I. Burtonwood, 620-22nd St. W., Saskatoon, Sask., writes:—"My child, when only seven months old, had a very severe attack of dysentery, and after three days' treatment with other things we decided to use

On this day his bowels had moved twenty-three times in eleven hours, but four doses checked it.

"A short time ago we offered it to a neighbor whose baby was troubled, and it too was relieved within thirty hours.

"We both always keep a bottle of 'Dr. Fowler's' handy at all times."

This medicine has been on the market for over 80 years; put up only by The T. Milburn Co., Ltd., Toronto, Ont.

Japan Favors Canadian Wheat

Wheat From Dominion Has Supplanted U.S. Product In Japanese Market

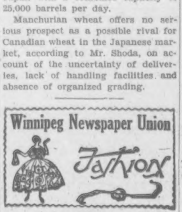
Quality and price are the factors which have enabled Canadian wheat to completely supplant the United States produce in the Japanese market, declares Tutchiro Shoda, president of the Nisshin Flour Mills Company, Limited, who was in Vancouver in the course of a trip of inspection which will take him to the wheat centres of Canada, United States and Europe.

The company which Mr. Shoda heads imports an average of 250,000 tons of Canadian wheat annually. It is all shipped through Vancouver.

Mr. Shoda has been in the milling business for thirty years and operates 12 flour mills in all parts of Japan with a combined capacity of 25,000 barrels per day.

Manchurian wheat offers no serious prospect as a possible rival for Canadian wheat in the Japanese market, according to Mr. Shoda, on account of the uncertainty of deliveries, lack of handling facilities and absence of organized grading.

Winnipeg Newspaper Union



DIGNIFIED LINES

An attractive printed silk crepe with smart uneven hemline in handkerchief drape, with shaped hip yoke to secure slender appearance for the larger woman is seen in Style No. 230. The molded bodice has French V at front to break the width. It is finished with vesteforming a becoming square neckline. It is especially lovely in sheer printed crepe for more formal occasions. Flat silk crepe, crepe satin, georgette crepe, crepe Elizabeth and canton-faille crepe are smart suggestions. Pattern is designed in sizes 16, 18, 20 years, 36, 38, 40, 42, 44 and 46 inches bust measure. Size 36 requires 3⅝ yards of 40-inch material with ½ yard of 10-inch contrasting. Price 25 cents in stamps or coin (coin preferred.)

"Last North" Is Prosperous

Canada's "Last North," the great Peace River Country, is fast being settled and promises to have a very prosperous crop season this year, says Dr. W. J. Black, Director of Colonization and Agriculture, of the Canadian National Railways, who has returned from a tour of the territory.

The course of true love never runs smooth, and in later years the bachelor is often glad of it.

Rubber jewelry is the latest fad. We wonder if wedding rings will carry a no-blowout guarantee.

CAPTURES CHAMPIONSHIP

Helen Wills, who won the women's single championship at Wimbledon, England, defeating Helen Jacobs, her fellow Californian, in straight sets, 6-1, 6-2.

Cross Crossings Cautiously

National System Starts Drive To Combat Level Crossing Accidents

As a further effort in the campaign to reduce crossing accidents, the Canadian National Railways, through the Director of Safety, W. A. Booth, have distributed two thousand copies of a special card from the lithographed face of which, is an appeal to motorists, and others, to "Cross Crossings Cautiously." These posters are being sent out from the headquarters of the three regions in Canada, at Moncton, Toronto, and Winnipeg. Atlantic, Central and Western, respectively, so that every Canadian National grade crossing in the Dominion will be marked. The instructions are to place these posters on poles close to the railway crossings and on the right hand side of approach.

In the letter of instructions it is stated "The time is now opportune when aggressive methods must be taken to combat the increasing number of highway accidents."

Abolish Corporal Punishment

Juvenile Offenders In Britain May Escape Birch Rod

Youthful law-breakers in England will no longer have to fear the birch rod if a movement to abolish corporal punishment for young offenders is successful.

W. Clarke Hall, London police court judge, explained his opposition to the widespread practice of "birching" at a conference of 70 judges and presented a report showing that 80 per cent. of the boys who had been whipped in a certain court came back again charged with similar offences.

Prosperity Reflected

Marked Growth Is Evidenced On All Sides In City Of Regina

In a booklet issued by the Regina Board of Trade, dealing with statistics of the city as revised on June 1st, marked growth is seen on all sides in the capital of the province. Building permits for the first five months of the year reached a total of $4,389,772 as compared with $1,-300,855 for the corresponding period of 1928, while bank clearings, postal revenue and other such indices to prosperity all reflect prosperity and expansion.

Registered Seed

It is hoped to have the plant of the Saskatchewan Registered Seed Growers' Limited, on South Hill, Moose Jaw, ready to handle the registered seed from the 1929 crop. This follows the passing of estimates in the House of Commons, on behalf of the Department of Agriculture, of $150,000 for the seed cleaning plant and warehouse at Moose Jaw.

The Columbia Ice Field

The melting waters from the Columbia Ice Field in Jasper National Park, Alberta, feed the sources of three historic rivers in the Canadian west, the Athabaska, the Saskatchewan, and the Columbia, which flow to three separate oceans.

More than half the arable land in Japan is in rice.

Most of the bacon eaten in Britain is imported from Denmark.

Recipes For This Week

(By Betty Barclay)

VEGETABLE SALAD MELANGE

Cook one cup of shredded string beans until tender in boiling, salted water, with one-half teaspoon of sugar. Do the same with one cup of shelled peas. Mix the peas and beans with one cup of shredded cucumber and one-half cup of thinly sliced radishes. Add French dressing and let stand a half hour. Meanwhile, hardboil six eggs, halve them, and cut off the ends so they will stand upright. Arrange the halves of the eggs on salad plates. Arrange crisp lettuce leaves around each egg half, and place some of the vegetable mixture on the leaves. Serve very cold with mayonnaise.

VANILLA CUSTARD FLUFF

1 junket tablet.
1 tablespoon cold water.
1 pint milk.
1½ tablespoons sugar.
½ teaspoon vanilla.
2 eggs.

Crush the junket tablet and dissolve it in the cold water. Add sugar to milk and heat to lukewarm—not hot. Add vanilla and beaten egg yolks. Stir in the stiffly beaten whites of eggs. Then add the dissolved junket tablet; stir a second. Pour into individual dessert glasses; let stand in a warm place until firm; then cool before serving. Some of the egg white will rise, making fluffy topping. Sprinkle with grated nutmeg.

Information On Water Power

Government Has Data Concerning Water Power Throughout the Dominion

The comprehensive system of compiling all available data concerning water power resources and development throughout the Dominion instituted by the Dominion Water Power and Reclamation Service, of the Department of the Interior, many years ago, and maintained with constantly increasing efficiency and thoroughness, places exceptionally complete information on this great natural resource at the disposal of the public. This compilation at one central source, for areas under either Dominion or provincial administration, the latter by collaboration with the provincial governments, enables an exceptionally complete review of the resources of any watershed or other area in the Dominion.

Awarded Scholarship

Chemistry Instructor At Saskatchewan University Receives High Honor

Norman S. Grace, instructor in chemistry at the University of Saskatchewan, has been awarded the Belt scholarship to the University of London, Eng., where he will continue his studies in chemistry. This award is considered a high honor as there are only three of these scholarships for the British Empire, and they have not often been given to Canadian students.

The winner is the son of Mrs. E. R. Grace, 1034 Aird Street.

S. A. H. Grace, who recently won first class honors in physiology at Oxford where he holds a Rhodes scholarship, is a brother, as is also Nathaniel H. Grace, who has frequently appeared in University honors lists.

For First Offenders

Attorney-General Of Ontario In Favor Of More Frequently Suspending Sentence

The Attorney-General of Ontario, Hon. W. H. Price, would enlist the sympathy of judges and others in favor of more frequency suspending sentence on first offenders. After a long and varied experience it is his opinion that lives are frequently wrecked by court sentences for offences against the laws that are really not very serious in character. It is unboubtedly true that once a boy or man has the stigma of conviction against him he is badly handicapped in the race of life. Mercy is not being asked for those hardened in crime, but for those who have committed their first fault. One cannot but sympathize with the idea.

A woman first sheds a few tears—and then proceeds to open the telegram.

A spool of thread was unknown 125 years ago.

Michigan has by far the greatest coast line of any state.

No jumpy feeling NOW when I drive through traffic

Nothing relieves tension so effectively as Wrigley's. The act of chewing, as motorists have discovered, has a gentle soothing effect. The healthful cleansing action of Wrigley's refreshes the mouth and steadies the nerves.

WRIGLEY'S

Judgment Is Reserved

Privy Council Withholds Decision On Dominion Fisheries Act

The judicial committee of the Privy Council reserved judgment on the appeal of the Dominion of Canada from a ruling of the Canadian Supreme Court which held that sections 7a and 18 of the Canadian Fisheries Act of 1914, were ultra vires of the Dominion parliament.

The important point at issue is whether under the British North America Act which gives it power to legislate "on seacoast and inland fisheries" the Dominion parliament can set up a system of licensing of fish canners as it sought to do under the sections of the fisheries act.

The provinces of British Columbia, Quebec and Ontario, are respondents in the action as well as British Columbia fishermen of Japanese origin.

Towns Form Boards Of Trade

"There is no better evidence of faith in a district than the example of its business men forming a Board of Trade to advance its welfare," says the Edmonton "Chamber of Commerce News." "During the last month, boards have been organized at the following towns: Thorhild, (R. Baker, Secretary); Innisfail, (C. R. Field, Secretary); and Slave Lake (A. Peart, Secretary)."

Record Of Fire Losses

Fire losses in Canada during the week ended July 10, 1929, are estimated by "The Monetary Times" at $239,500, as compared with $139,200 for the previous week, and with $264,750 for the corresponding week of last year. From January 1, 1928, fire losses totalled $11,135,950, and from January 1, 1929, to July 10, 1929, they were $12,976,250.

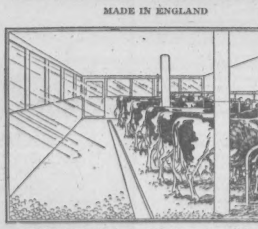
More than 1,350 shocks were felt during the Japanese earthquake of 1923, which took a toll of 200,000 lives.

WINDOLITE

MADE IN ENGLAND

The Improved Glass Substitute

COMES WITH A MESSAGE OF HEALTH



THE sun is the all-powerful life producer, Nature's universal disinfectant and germ destroyer as well as stimulant and tonic. **WINDOLITE** is the sun's most important ally.

Medical research has definitely proved that from the point of view of Health and Hygiene, the most effective among the sun's rays, are the Ultra-Violet rays, which possess the greatest power for the prevention and cure of disease and debility.

Science has further established that ordinary window glass does not allow the passage of Ultra-Violet rays, so that by using glass we are artificially excluding these vital health-giving rays. Therefore, the invention of **WINDOLITE** has completely satisfied the long-felt want. Exhaustive experiments have conclusively proved that it is a most effective substitute for glass, that it freely admits the Ultra-Violet rays, and that its use has a most beneficial effect on the growth and development of plants and chickens and on the well-being of cattle, enabled for the first time to have healthy light instead of darkness in their sheds.

Indeed, the discovery of **WINDOLITE** has during the last six years completely revolutionized gardening, given a new stimulus to poultry breeding, increasing the egg-laying capacity and fertility of chickens, has greatly improved the health of cattle and is now being used in domestic and household requirements.

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold —will not crack or chip,—cuts with an ordinary pair of scissors and is easy to fit. **WINDOLITE** is supplied in rolls any length but in one width of 36 inches only. A square yard of **WINDOLITE** weighs about 14 ozs., while a square yard of glass of ordinary thickness, weighs about 135 to 190 ozs. The improved **WINDOLITE** requires no varnish. **WINDOLITE** is made in England.

Price $1.30 Per Square Yard, f.o.b., Toronto.

Use WINDOLITE and let YOUR PLANTS YOUR CHICKENS YOUR CATTLE Bask in 100% Sunlight

The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Marcus, the famous Broadway producer, heads a party of four that visits Blackie Joe's night club in downtown New York. Al Stone, Blackie's chief comedian and singing waiter, begs Molly, the ballad singer, to render a love song he has just written for her. Molly is disdainful and refuses even to read the song. Al is in love with her but she tells him harshly that she will never marry a waiter. Then she leaves her dressing room and goes to the Marcus table, trying to ingratiate herself with the famous producer. Al is in despair, Grace, the cigarette girl, who loves Al and wants to see him happy, asks him what is the matter.

CHAPTER V.

"Nothing's the matter, kid," said Al, making a show of throwing off his depression. But his wan smile belied his words.

Grace gazed hopefully up into his face. Her expression said plainly that if he would only confide in her she was sure she could help him.

Slowly he studied her young, sensitive features. She was an awfully sweet kid, undoubtedly, and he liked her, but—

At that moment someone else arrived to interrupt his thoughts. Blackie, all excitement, entered the corridor, calling out:

"Get ready Al—you're on next!"

Al turned lack-lustre eyes toward Blackie. Then, suddenly, a plan that had been forming vaguely in his mind ever since Molly's harsh exit, took definite shape. He drew himself up and said quietly:

"Blackie, I'm quitting tonight."

Blackie retreated a step as if he had been struck, while a little cry of amazement escaped Grace. Her hand went to her mouth in a quick gesture of apprehension. Blackie was the first to recover himself.

"Don't be a fool, Al," he said earnestly, putting a hand on his singing waiter's shoulder. "You've got a good job here and a following among the customers. You can't quit off-hand like this — why, it wouldn't be fair to me or to yourself."

Al nodded slowly. Yes, he had thought of that. But there were other things to be considered.

"You won't miss me," he suggested. "You've got lots of talent. And I simply couldn't sing a comic song tonight—it's impossible the way I feel. And Blackie—I don't want to be a waiter any more. I want to write. The waiter racket will never get me anywhere—I know it!"

Al's vehemence increased as the words poured from his mouth. He saw his way clearly now—he would leave this place and never see Molly again. That was the only way to solve his problem. Suddenly his sense of reserve was lifted from him; he determined to give Blackie his complete reason.

"The only reason I've hung on here," he exclaimed passionately, "was to be near her! She's turned me down and—it hurts. She's the only person in the world I want, and without her . . . . Well, you can see now why I can't stay."

His voice trailed off at his concluding words and his shoulders sagged hopelessly. Blackie nodded. Again his hand rested comfortingly on Al's shoulder. He could see how vitally this affected his prize singing waiter—why, the boy's whole world had been turned upside down?

"Molly—eh?"

Al's head came up at the mention of the beloved name. He nodded.

"I wrote her a song—a love song. I poured my heart into it because it was for her. I wanted her to sing it, so she'd know how I felt toward her, but do you know what she did? She wouldn't even look at it; she laughed . . . . I found the song-sheet here on the floor where she had walked on it."

Al glanced down at his hand, which still held the crumpled ballad. There was nothing more for him to say now; Blackie understood at last.

If Al's explanation of his sudden decision astonished Blackie, it produced reactions that were much more startling and complicated in little Grace. She was not only hurt because Al was hurt, but, for the first time, resentment flared up in her toward Molly. How could Molly, who was able to put such a wealth of feeling into the rendering of a ballad, act in such an unfeeling way toward Al?

Grace's slim white fingers pressed hard against the sides of her cigarette tray until the skin went white. A sudden wave of passionate anger—the other girl swept over her; she wanted to turn, rush into the main room, and upbraid Molly for her heartlessness. Keen-eyed Grace knew that Molly had left Al to go to the Marcus table. She knew Molly was trying to worm her way into the good graces of the producer.

Then the anger passed as quickly as it came, while an expression of tender sadness crossed Grace's face. She realized that these admissions of Al's meant that she could never mean anything to him, never have a chance to help him. They meant that he would pass out of her life completely, perhaps within a few moments. She felt tears welling up in her eyes, but she bravely fought them down.

By this time a plan was emerging in Blackie's mind to aid his singing waiter. After all, Al was his friend as well as his star performer in the floor show, and he wanted to do him a good turn if he could.

"Why don't you read your song to Molly" he suggested, with assumed carelessness.

"She won't listen," Al answered. "To her I'm only a waiter — a mug!"

"Then why don't you sing it to her?" continued Blackie, springing his idea. "She's out there now — she'd have to listen."

Al shook his head. "I can't sing it. It's a love song—a ballad. You know I've never been able to sing the heart-throb stuff. That's not my line. I'm a comic."

"You haven't sounded so darn comic," Blackie countered quickly, "telling us all this. How do you know you can't sing a heart song? Have you ever tried it—I mean in public?"

"No, I've never tried one on the floor," Al admitted, "but I've tried rehearsing them and I was an awful flop."

"Yes, but don't you see, this is different. You wrote this song for Molly and you feel it. If you go out there and forget yourself, and sing it at her, you can make her feel it. Take a chance—they can't kill you. If the song goes over she'll understand for the first time how you really feel about her. Look what you stand to win!"

Al stared into the earnest eyes of Blackie, almost convinced. Could he do it, could he put the same feeling into his singing that had possessed him when he wrote the song. If he could he might be able to touch Molly's heart, as Blackie suggested.

Little Grace watched anxiously the play of expression on Al's face. She saw clearly what Blackie was driving at before Al saw it, and she hoped desperately that he could prevail on Al to try the song. If the words touched Molly's heart at least Al would be happy, which would make Grace happy.

"I'll do it," he said finally, with a gesture of decision. "I'll show her I'm something better than a waiter. I'll put everything I have into that song!"

Blackie wrung his hand. "Go to it, boy," he said enthusiastically. "You'd better make your entrance as soon as you can—while you're in the mood. Meanwhile, I'll see how the show's going."

When Blackie disappeared Grace also vanished down the corridor. But as Al came out into the main room a moment later he heard his name called. Grace slipped over to his side, looked up into his face with a forced, wistful smile and whispered:

"I'll be rooting for you, Al!"

"Will you, kid? Say, I appreciate it."

He raised his hand, patting her lightly on the cheek, as he would have caressed a sister. He noticed that her cheek was too warm, but he thought it was merely from excitement.

Al he turned nervously away Grace raised her hand to her face, where his hand had rested for an all too brief moment. The spot was burning. She saw him move lightly across the room and approach the pianist to give him the new music. The pianist's mouth opened in astonishment at the idea of Al Stone, the comic, singing a heart song. Then Grace saw the man she loved heading for another woman. Would he put it over?

(To Be Continued.)

From Mother of Six

"I think Lydia E. Pinkham's Vegetable Compound is wonderfull I have had six children of which four are living and my youngest is a bonnie baby boy now eight months old who weighs 23 pounds. I have taken your medicine before each of them was born and have certainly received great benefit from it. I urge my friends to take it as I am sure they will receive the same help I did."—Mrs. Milton McMullen, Vanessa, Ontario.

The Newest Discovery

American Chemical Society Told Gasoline Can Be Made From Trees

Gasoline made from trees is announced in a report to the American Chemical Society by Dr. Jacque C. Morrell and Dr. Gustav Egloff of Chicago.

They have produced an anti-knock motor fuel from the tar in the Douglas fir. While this fuel now is in the laboratory stage, the report says it can be made in commercial quantities from present wood waste.

"The development of a practical and economic means of converting wood waste into motor fuels," says the report, "has a deeper significance than the immediately important factor of conservation—it provides a source of motor fuels for the future which is under the direct control of man.

"Our great storehouses of potential motor fuel from petroleum, coal and oil shales are heritages from past ages, while wood tars and other vegetables are producible under controlled conditions.

Approximately 24 per cent. of the standing tree is converted into useful products, while 76 per cent. is wasted.

Want World Peace

A petition signed by 17,800 women voters of the district of Bolton, asking the House of Commons to use all possible efforts to secure world peace by the fullest use of the Kellogg pact and the optional clause of the compulsory arbitration agreement, has been presented to the House by Albert Law, Labor leader.

New Invention a Success

Pittsburg Has First Aluminum Street Car In World

Pittsburgh has the first aluminum street car in the world. This car, as either the Pittsburgh Railway Company, or the Aluminum Company of America will say, has the formal title of the new lightweight aluminum car No. 6002.

This innovation in car building made its first trip through the Southside and Southhills districts. The car is built for vision—for the passengers. It has windows without the usual paneled obstructions and those same windows can be raised or lowered at leisure with the same ease and the same sort of gadget as an automobile's.

The vehicle was built with special attention to speed comfort and safety. The seats are form-fitting and one can recline in ease in them. The floor is a non-skid composition. The lights are subdued, arranged so as to give their rays almost directly.

New Air Base Established

Mineral Exploration Company Will Make Headquarters At Sioux Lookout

The Northern Aerial Mineral Exploration Company have decided to make Sioux Lookout, situated on the main line of the Canadian National Railways, their headquarters for operations in the Patricia District, and they announced recently that a 200 acre camp site on the lake front has been laid out, which will be the nucleus of a modern village with all conveniences. It will contain shipways, hangars, offices, machine shops, and assay office. Sioux Lookout is the scene of much activity; engineers and scouts for the chief mining concerns are establishing headquarters at this point for the season's activities. They include the Mining Corporation, Atlas Exploration, Nipissing, Huronian Belt, and Lindsley and Connell interests.

Minard's Liniment for Neuralgia.

Reduction In Canada's Debt

Net Debt Of Dominion Decreased By $92,620,133 Last Year

The net debt of the Dominion of Canada decreased by $92,620,133 in the twelve months ended June 30 last, according to figures issued through the finance department. At the end of June, 1928, the net debt stood at $2,244,142,450. On June 30 last, it amounted to $2,151,522,317. During the first three months of the present fiscal year, which are covered by the statement issued recently, ordinary revenue of the Dominion showed an increase of $13,529,152, over the corresponding period a year ago. The increase in ordinary expenditure is shown as $591,266. The statement represents only the receipts and payments which have passed through the books of the finance department up to the last day of June.

Fresh Supplies In Demand. — Wherever Dr. Thomas' Eclectric Oil has been introduced increased supplies have been ordered, showing that wherever it goes this excellent Oil impresses its power on the people. No matter in what latitude it may be found its potency is never impaired. It is put up in most portable shape bottles and can be carried without fear of breaking.

Edmonton Soap Factory

It is reported that a soap factory will be opened in Edmonton shortly by United States interests and will engage about seventy-five people. J. C. Moore, Calgary, is the managing director and he is reported as stating that at present negotiations are pending for the purchase of a plant and site, also that machinery and supplies are now in transit.

Government To Aid Berry Growers

The B.C. Government has undertaken to assist berry growers to preserve their surplus crop of the 1929 season and is advancing a loan to a company to be known as Berry Processors Limited, which will have plants at Victoria, New Westminster and Haizie.

The up-and-coming man is pretty likely to succeed, unless he is up at four and just coming home.

Something In Weather Cycles

Records Show Seasons Have Practically Followed Same Curve

Looking back over weather records makes one believe, says an English writer, that there really may be something in the sun-spot theory of a ten-to-twelve year cycle of weather over Western Europe. There was a spell of hard winter in 1895, another in 1906, a third in 1916, and now here we are having a fourth in 1929. The summers, too, have followed more or less the same curve. But why should sun-spots affect only Western Europe? Must not the influence of the Atlantic Ocean be taken into the account?

Rebukes Cameraman

Colonel Lindbergh Did Not Like His Dishonest Method

Col. Charles A. Lindbergh delivered a lecture at San Francisco on honesty and integrity. The colonel, whose aversion to sound reels is well known, was approached by a "talkie" cameraman, who had a microphone concealed under his sweater. The flyer detected the ruse and said: "That's not honest; why didn't you approach me with the microphone in plain sight? That would be the honest thing to do." He refused to talk for the "mike," because you have not been fair in this matter."

KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how fatal the hot summer months are to small children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevent stomach and bowel troubles, or if trouble comes suddenly—as it generally does—the Tablets will bring the baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Little Helps For This Week

"The eternal God is thy refuge, and underneath are the everlasting arms."—Deut. xxxiii. 27.

What though the way be rough and steep?
What though we stumble as the blind?
There's joy reserved for those who weep;
The everlasting arms are kind.

What matters it if sorrows come?
What though the night be dark and long?
The darkest cloud but hides the sun;
The everlasting arms are strong.

One great purpose in all affliction is to bring us down to the "Everlasting Arms." What new strength and peace it gives us to feel them underneath us? We know that, far as we may have sunk, we cannot go any farther. Those mighty arms can not only hold us, they can lift us up. They can carry us along. Faith, in its essence, is simply a resting on the everlasting arms. — Theodore L. Cuyler.

MOST people rely on Aspirin to make short work of their headaches, but did you know it's just as effective in the worse pains from neuralgia or neuritis? Rheumatic pains, too. Don't suffer when Aspirin can bring such complete comfort without delay, and without harm; it does not affect the heart. In every package of Aspirin you will find proven directions with which everyone should be familiar, for they can spare much needless suffering.

Canada's Day-Old Chick Industry

Number Of Chicks Sold Each Year Runs Into Millions

The baby chick industry has grown to such an extent in Canada that the Department of Agriculture has taken action to safeguard the interests of the buyers of day-old birds. From a small beginning a few years ago the industry has already reached enormous proportions, and the number of chicks sold each year runs into the millions. The Department now provides a guarantee that a farmer buying chicks from an approved hatchery may rest assured that the stock from which the hatching eggs came conforms to a high standard of excellence, and that the hatchery in which the chicks were incubated was clean, sanitary, and well conducted.
